

ASHISH KOSANA

Software Engineer — Backend & Full-Stack

Tempe, AZ · 978-427-8527 · ashishkosana@gmail.com

linkedin.com/in/ashishkosana · github.com/Ashishkosana · ashishkosana.com

SUMMARY

Computer Science graduate who ships production software end-to-end — REST APIs, authentication, payments, and cloud infrastructure — backed by tests and CI. Comfortable across Python / FastAPI, Flutter, SQL databases, Docker, and AWS serverless.

SKILLS

- **Languages:** Python, Dart, SQL, Bash
- **Backend:** FastAPI, REST API design, JWT / OAuth2 auth, multi-tenant data isolation, SQLAlchemy / SQLModel / SQLAlchemy, Stripe payments & webhooks, Postgres, SQLite
- **Frontend / Mobile:** Flutter (cross-platform iOS / Android)
- **Cloud / DevOps:** AWS (Lambda, Cognito, S3, CDK, EC2), Docker & docker-compose, GitHub Actions (CI/CD)
- **Quality:** pytest, test-driven design, security review (OWASP Top 10), Git
- **Certifications:** Microsoft Certified — Azure Database Administrator (DP-300); Fabric Data Engineer (DP-700)

EXPERIENCE

Software Engineer Intern — Crewtron

Tempe, AZ · May 2026 – Present

- Shipped **clock-in/out with geofence auto-tracking and a live crew map** end-to-end — Flutter UI plus a Python **AWS Lambda + DynamoDB** backend — with role-scoped crew visibility and presence-based auto clock-in.
- Built cross-platform **mobile features in Flutter** integrated with the **Stripe API** (invoicing, quotes, payments) and a **UTC timezone pipeline** powering a timezone-aware calendar.
- Designed **REST APIs with AWS Cognito** authentication, managed **AWS CDK** infrastructure and IAM policies, and built merchant **review-request flows** over email / SMS.
- Drove quality through structured QA, **security review (OWASP Top 10)**, and a disciplined Git + PR-review workflow; integrated Claude + Python automation into internal tooling.

PROJECTS

career-copilot — full-stack job-search agent (Flutter iOS app + AWS serverless) · Flutter · AWS (Lambda, DynamoDB, API Gateway, Cognito, CDK) · Python

github.com/Ashishkosana/career-copilot

- Built a **Flutter iOS app** (Cognito SRP auth, Dio + JWT interceptor, Riverpod) that reads a **REST API** served by **AWS Lambda** behind a **Cognito authorizer**.
- Designed the backend as **infrastructure-as-code (AWS CDK)**: a daily **EventBridge** cron Lambda, a **userId-partitioned DynamoDB** table, and **Secrets Manager** for third-party keys.
- Pipeline triages Gmail, scores job matches, and drafts replies with the **Claude API**; **38 unit tests** and Docker-free Lambda packaging, deployed live to AWS.

linkvault — multi-tenant SaaS API · FastAPI · JWT · Stripe · Postgres · Docker

github.com/Ashishkosana/fastapi-saas-api

- Built a multi-tenant bookmarks SaaS API with **JWT auth** (bcrypt, OAuth2 flow) and strict **per-user data isolation** enforced at the query layer.
- Integrated **Stripe subscription tiers** where a signature-verified **webhook** is the source of truth for a user's plan; free tier capped, Pro unlimited.
- Containerized with Docker + docker-compose (API + Postgres); **14 tests** (auth, isolation, billing flow) and GitHub Actions CI that also builds the image.

envlint — zero-dependency CLI dev tool · Python

github.com/Ashishkosana/envlint

- Published a CLI that lints `.env` files against a declared schema (missing / empty / mistyped / duplicate keys) with CI-friendly exit codes and JSON output; tested on Python 3.12 and 3.13.

EDUCATION

B.S. in Computer Science — University of Massachusetts Lowell

Graduated Dec 2025

GPA 3.51 / 4.00 · Dean's List · Transferred from SR Institute of Technology (JNTU), Hyderabad to complete the B.S.

Authorized to work in the U.S. (F-1 OPT) · open to H-1B sponsorship · open to relocation
